CAD Drafter

Detail-oriented Computer Science graduate with hands-on experience in AutoCAD, Revit, SolidEdge, and architectural design coursework, producing technical drawings, 3D renderings, plans, sections, dimensions, and annotated deliverables. Strong technical foundation in software, data, and systems with a focus on precision, documentation quality, and design clarity. Seeking CAD / BIM / Drafting opportunities in design and technical production environments.

Education

Florida International University - Bachelor of Arts, Computer Science

Miami, FL

Relevant Coursework: Data Structures, Systems Programming, Software Engineering, Data Mining, Logic for Computer Science

Seminole State College (In Progress) – Associates of Science, Computer Aided Design Technologies

- 2D Drafting and Dimensioning
 - Layers, Line Types, Annotation & Scaling
 - Sections, Elevations, and Detail Drawings
 - Template & Sheet Layout Development
 - Revit modeling and documentation fundamentals
-

Technical Skills

CAD / Design Tools

- AutoCAD (2D Drafting)
- Revit (Basic Modeling & Documentation)
- Technical Drawing Standards
- Dimensions, Leaders, Annotation Scaling
- Layers & Template Setup

- Siemens solidEdge
- Sheet Layouts & Title Blocks
- Sheet Metal

Visualization / Documentation

- Technical Plans & Sections
- Drafting Deliverables
- Drawing Readability & Standards
- Markups & Revisions

CAD & Drafting Portfolio Projects

Technical CAD Coursework Portfolio

Portfolio Website: [portfolio](#)

- Produced multiple AutoCAD drafting assignments including dimensioned drawings, technical components, and layout sheets
- Applied layering standards, annotation scaling, and readable dimension practices
- Created plan, section, and detail-style technical drawings
- Generated sheet layouts with title blocks and consistent documentation formatting
- Converted DWG outputs to presentation-ready deliverables
- Organized deliverables into structured portfolio set with preview sheets and PDF packages
- Multiple Sheet Metal rendering using Solid Edge

Professional Experience

Customer Service & Operations Roles — Retail & Theme Park Environments

- Delivered consistent, high-quality customer support in high-volume environments
- Followed procedural standards and documentation requirements
- Worked within structured operational workflows
- Maintained accuracy and attention to detail under time constraints

Strengths Relevant to CAD & Drafting Work

- High attention to detail
- Strong technical accuracy mindset
- Clean documentation habits
- Structured file organization
- Comfortable working from standards & templates
- Fast learner with technical tools
- Reliable and deadline-driven
